Dublin, Dec. 18, 2019 (GLOBE NEWSWIRE) – The "[Palm Oil Market, Volume Global Forecast By Top Consumption, Top Production, Top Importing, Top Exporting, Companies](#)" report has been added to [ResearchAndMarkets.com](#)'s offering.

This report provides a complete analysis of global palm oil market. According to the report, the Global Palm Oil Market is expected to reach a volume of 111.3 Million Tons by the end of the year 2025.

Palm oil is semi-solid at room temperature and has saturated vegetable fats. It is commonly used for cooking purposes in many nations due to its reduced price and elevated oxidative durability. Growing awareness among consumers of health advantages is the growing global demand for palm oil.

Besides many personal products, including liquid detergents, soaps, shampoos, lipsticks, waxes, polishes, make-up, and more, use palm oil; thus this is further driving the growth of palm oil market. Palm oil is displacing petroleum-based products in the transportation and energy industries as a convenient option for fossil fuels. Indonesia is the top nation for palm oil consumption and production. The Indonesian government is helping manufacturers and producers of regional palm oil and allowing a large area to be planted.

While palm oil is chemically stable, productive, and low price, expanding its use has resulted in deforestation and loss of habitat, comes under the challenges of the palm oil market. However, the top palm oil companies are implementing the corporate social responsibilities initiatives by launching various programs to protect the rights of children who are residing in palm oil plantations. Such as, Wilmar International, in collaboration with Aidenvironment, stepped up to protect the plantation from deforestation.
